

eDiscovery Platform and Merge1

eDiscovery beyond email with Veritas.

OVERVIEW

Although email is still heavily used by many organizations, more and more business communications have eclipsed it to some extent with focus on new digital mediums, like social media, instant messaging and mobile communications.

Capturing these communications has become essential for:

- Compliance with industry and government regulations.
- Support of eDiscovery efforts for legal cases and investigations.
- Retention of communications for corporate governance and other mandates.
- Internal policies from HR or legal to keep business communications on file.

Merge1 complements Veritas eDiscovery Platform to incorporate all of the data sources most relevant to your regulatory compliance, internal policies and eDiscovery initiatives.

CAPTURE

Extensive data source support—Capture more than 80 popular message types, including social media, instant messaging, mobile communications, financial platforms and cloud-based content.

KEY FUNCTIONAL AREAS

Legal Hold

Identification & Collection

Processing & Analysis

Review & Production

KEY BENEFITS

Centralized discovery of all content—Streamline eDiscovery by centralizing all captured data from Merge1 into a single repository—eDiscovery Platform.

Capture confidently—Common platform with deep understanding of many content sources allows you to confidently capture and manage unstructured information in a consistent manner.

Stay compliant—Improve compliance with industry and government regulations, such as the General Data Protection Regulation (GDPR), MiFID II, SEC 17-a4 and many others by capturing relevant electronic content beyond email.

Collaboration

Chatter	SharePoint
Chatter Cipher Cloud	Skype for Business
Cisco Webex Teams	Slack
Crowd Compass	Slack eDiscovery
Jabber	Twitter
Jive	Workplace by Facebook
Microsoft Teams	Yammer
	Zoom Meetings

Financial Platforms

Bloomberg
Eikon Messenger
FXConnect
IceChat
Qtrade
Redtail Speak
Symphony
UBS
XIP
Yieldbroker

Mobile and Text

AT&T
BlackBerry
CellTrust
DingTalk
SMS
Verizon
WeChat
WhatsApp

Document Collaboration

Amazon S3
Box
Citrix ShareFile
DropBox
Google Drive
Microsoft OneDrive

Capture filtering—Configure content source capture based on date range to optimize initial capture operation.

Message threading—Pull the whole conversation, consisting of many interactions, into one archivable item.

Native capture—Captures from content source via native APIs.

eDISCOVERY

The Merge1 integration provides all the capabilities of the eDiscovery Platform across all the content sources collected by Merge1.

Seamless integration—Perform collection from all supported content sources directly into eDiscovery Platform.

Metadata filters—Create targeted collections by filtering via metadata fields, eliminating the need for any scripting or programming.

Pre-processing analytics—Visually summarize overall document set characteristics and present detailed analysis by custodian, timeline and file type.

Veritas Integrated Classification Engine integration—Use classification to increase efficiency and expedite the review process.

Subject prefixes—Simplify review process by adding metadata to the subject line (for example, adding the content type, such as “Bloomberg:”, to the subject line of a message).

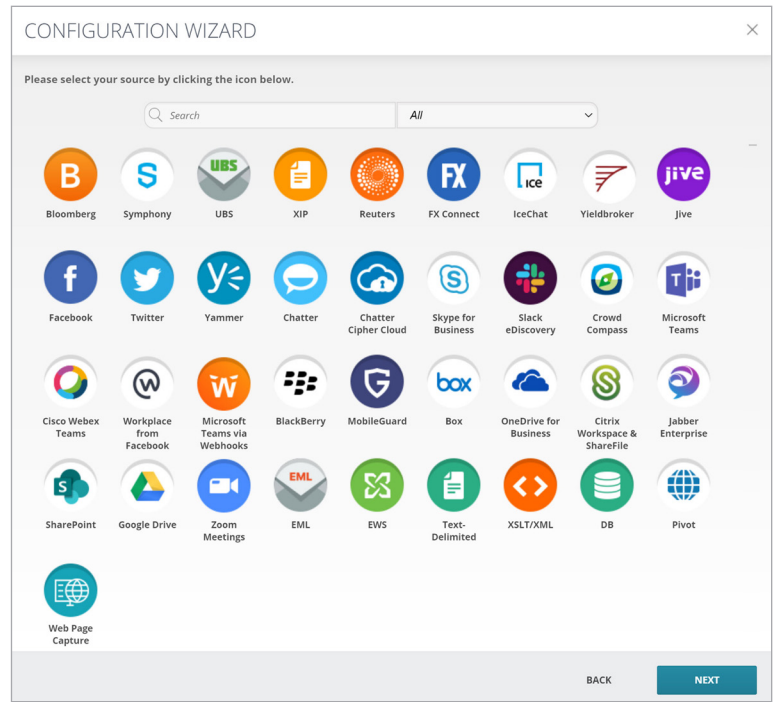

Monitored user filtering—Collects content for all custodians or specified custodians only.

MANAGE

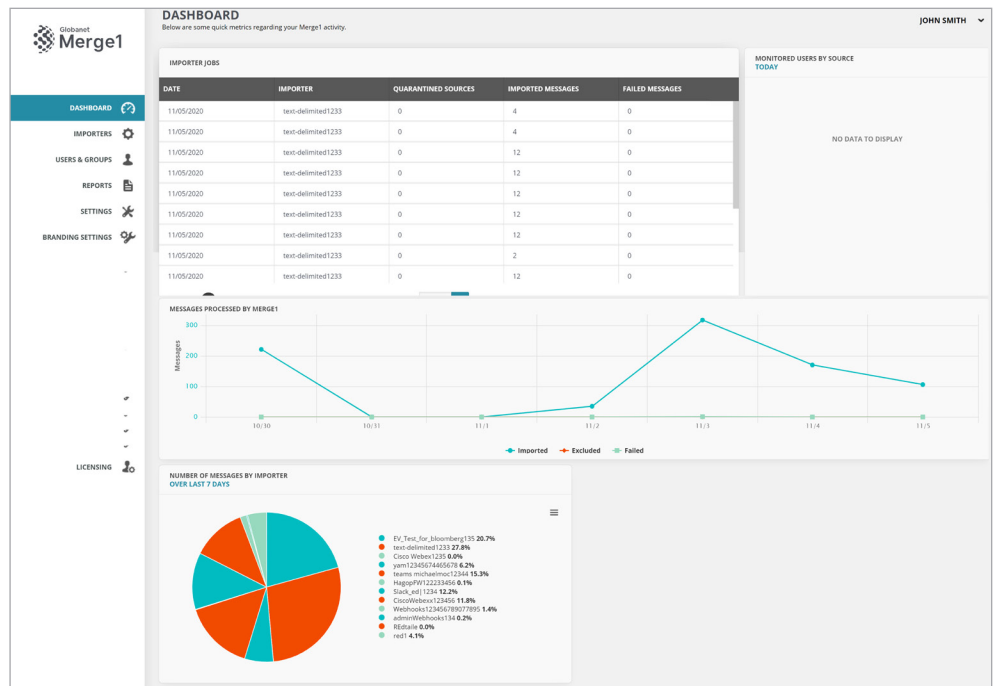

Flexible deployment—Deploy Merge1 on-premises or in the cloud.

Connector auto-update—Update only specific data source connectors as enhancements become available.

Consolidated management—Manage/add/remove all connections from a single pane of glass and immediately view, via our dashboard, which data sources you are capturing the most on a daily or trending basis.

Merge1 offers a wizard-driven workflow to help simplify configuring data sources to capture.

Easily manage and monitor all your Merge1 data sources from the dashboard.

ABOUT VERITAS

Veritas Technologies is a global leader in data protection and availability. Over 50,000 enterprises—including 87 percent of the Fortune Global 500—rely on us to abstract IT complexity and simplify data management. The Veritas Enterprise Data Services Platform automates the protection and orchestrates the recovery of data everywhere it lives, ensures 24/7 availability of business-critical applications, and provides enterprises with the insights they need to comply with evolving data regulations. With a reputation for reliability at scale and a deployment model to fit any need, Veritas Enterprise Data Services Platform supports more than 800 different data sources, over 100 different operating systems, more than 1,400 storage targets, and more than 60 different cloud platforms.
