

# Enterprise Vault Version Comparison

| Features   | 12.0      | 12.5      | 14.0     | 14.1     | Feature Notes  |
|--|-----------|-----------|----------|----------|--|
| Release Date   | Feb. 2016 | Oct. 2019 | Nov 2020 | Mar 2021 |  |
| Cloud & Platform Support   |           |           |          |          |  |
| Flexible deployment options  | ✓         | ✓         | ✓        | ✓        | Deploy on-premises, to the cloud (AWS or Azure) or as a hybrid model that meets your needs.  |
| Multiple content sources   | ✓         | ✓         | ✓        | ✓        | Search, preserve and review multiple enterprise content sources from a single vendor.  |
| Optical Character Recognition (OCR) image conversion (new in 12.0) | ✓         | ✓         | ✓        | ✓        | Ability to recognize and index text in images stored in Enterprise Vault archives; search for text in scanned documents, forms, faxes or screenshots after they are archived.                    |
| Records Management (new in 12.1)                                   |           | ✓         | ✓        | ✓        | Allows you to mark selected items such as records, conduct searches for these records and export them for transfer elsewhere. Fulfills the requirements of Capstone (U.S. government standard).  |
| OCR conversion enhancements (new in 12.2)                          |           | ✓         | ✓        | ✓        | Extends the OCR functionality to convert images in PDF files, Microsoft Office documents and other file types.   |
| Native Google G Suite support                                      |           | ✓         | ✓        | ✓        | Configure G Suite to send journal emails to the Enterprise Vault SMTP server.  |
| AWS Cloud storage with native services                             |           |           | ✓        | ✓        | Support for AWS Cloud native services: <ul style="list-style-type: none"> <li>▪ S3 as primary storage</li> <li>▪ KMS encryption</li> <li>▪ IAM role</li> <li>▪ AWS GovCloud</li> </ul>           |
|  |           |           |          | ✓        | <ul style="list-style-type: none"> <li>▪ S3 Object Lock (WORM)</li> <li>▪ S3 Intelligent Tiering</li> </ul>  |
| S3 Generic Connector   |           |           |          | ✓        | Support for a Generic S3 connector for primary partition that allows archiving on S3-compliant storage devices.  |
| Compliance & Supervision   |           |           |          |          |  |
| Classification   | ✓         | ✓         | ✓        | ✓        | A framework that allows for automatic classification, metadata tagging and records identification, facilitating search, discovery, supervision and other activities.                             |
| Veritas Information Classifier support (new in 12.2)               |           | ✓         | ✓        | ✓        | Support for our next-gen classification engine with hundreds of built-in policies and patterns to help make informed decisions around retention period, storage tier, discovery and supervision. |
| Classification enhancements: PII                                   |           | ✓         | ✓        | ✓        | New policies for CCPA and personal data detection for Brazil, Croatia, Iceland, Russia, South Africa and Ukraine.  |
| Classification enhancements: PII                                   |           |           | ✓        | ✓        | New policies for personal data detection for China, India and Hong Kong.   |
| Classification enhancements: PII                                   |           |           |          | ✓        | New policies for personal data detection for United Arab Emirates, India and Mexico.   |
| Classification enhancements: COVID-19 and ransomware policies      |           |           | ✓        | ✓        | New classification policies for helping users tag COVID-related and ransomware content.  |
| Workplace Harassment Policy  |           |           |          | ✓        | Workplace harassment policy to classify data that could be related to bullying or sexual harassment.   |

| Features   | 12.0 | 12.5 | 14.0 | 14.1 | Feature Notes  |
|--|------|------|------|------|--|
| <b>Compliance &amp; Supervision</b>                                |      |      |      |      |  |
| Veritas Information Classifier – FIPS 140-2 compliance             |      |      |      | ✓    | Veritas Information Classifier 2.4.0 is Federal Information Processing Standards (FIPS) 140-2 compliant and meets the security requirements for cryptographic modules.   |
| Hotword Analysis   |      | ✓    | ✓    | ✓    | <ul style="list-style-type: none"> <li>▪ Filter items based on existing hotwords and hotword sets.</li> <li>▪ View count of hotwords found within each item.</li> <li>▪ View hotword statistics found in the selected item, including the count of the hotword based on the location.</li> </ul> |
| Escalation Review enhancements                                     |      | ✓    | ✓    | ✓    | Reviewers now have to add a mandatory comment before escalating any message, providing context about the reason for the escalation.  |
| Department hierarchy view  |      | ✓    | ✓    | ✓    | You can now view the list of departments, subdepartments and research folders in the correct hierarchy, rather than a flat list.   |
| Advanced Supervision   |      |      | ✓    | ✓    | A new full-featured Veritas Advanced Supervision solution offered on both EV and EV.cloud.   |
| Advanced Supervision – Search Preview                              |      |      |      | ✓    | Preview of department level search results before accepting/rejecting them.  |
| Advanced Supervision – Filter on Author and Subject                |      |      |      | ✓    | Filtering review items based on author or subject criteria.  |
| Advanced Supervision – Simplified Searching of monitored employees |      |      |      | ✓    | Searching and selection of monitored employees in a department while creating search.  |
| <b>Discovery</b>   |      |      |      |      |  |
| Legal Holds  | ✓    | ✓    | ✓    | ✓    | Search, preserve and initiate legal holds on archived data.  |
| Restricted Searches  |      | ✓    | ✓    | ✓    | In Discovery Accelerator, you can now restrict searches to access information specific to the departments in the Compliance Accelerator.   |
| Export to PST enhancements   |      |      | ✓    | ✓    | Conversion of EML to MSG.  |
| Export to NSF enhancements   |      |      |      | ✓    | Allow NSF rollover while exporting Domino items into NSF files. An administrator can configure the size of the NSF file in MB beyond which it will be rolled over.   |
| <b>Usability &amp; Reporting</b>                                   |      |      |      |      |  |
| Enhanced Search (new in 12.0)                                      | ✓    | ✓    | ✓    | ✓    | Several new enhancements that improve search capabilities, including search suggestions (based on previous searches), a “Recents” list and a customizable results pane.  |
| Analytics Connector (new in 12.2)                                  |      | ✓    | ✓    | ✓    | Provides third-party applications with Enterprise Vault index metadata, useful for analytics and machine learning applications.  |
| New OData reports  |      | ✓    | ✓    | ✓    | New reports show the count of items based on the classification policy applied and information on hotword statistics for items that were flagged by hotword hits.  |
| Custom message types   |      | ✓    | ✓    | ✓    | Search for, export and create reports for items based on selected message types.   |
| Hit highlighting navigation  |      | ✓    | ✓    | ✓    | Navigate between highlighted search terms within an item. In case of multiple search keywords, you can choose the keyword you want highlight and navigate on.  |
| Time-based searches  |      | ✓    | ✓    | ✓    | The <b>Date range</b> section now includes time controls in the <b>From</b> and <b>To</b> fields that allow you to specify the time along with the date to further refine the search.  |

| Features                                   | 12.0 | 12.5 | 14.0 | 14.1 | Feature Notes   |
|--|------|------|------|------|---|
| <b>Usability &amp; Reporting</b>           |      |      |      |      |   |
| Search Classification Tags                 |      | ✓    | ✓    | ✓    | In addition to selecting a tag value from the drop down, you can now type in the tag value to perform a search.   |
| SMTP Server Certificate settings           |      | ✓    | ✓    | ✓    | Configure connection security settings at the SMTP server-level that override the site-level settings.  |
| Power BI Templates for OData reports       |      | ✓    | ✓    | ✓    | New Power BI Templates you can use to connect to the OData web services and generate detailed reports.  |
| Advanced Supervision: web-based client     |      |      | ✓    | ✓    | Veritas Advanced Supervision will offer a new web-based client combining the best of AdvisorMail and Compliance Accelerator functionality.              |
| Enterprise Vault Dashboard                 |      |      |      | ✓    | Reflects the current state of Enterprise Vault Indexing at granular level. Helps an administrator take actions on unhealthy indexes in a timely manner. |
| Single Sign On for Enterprise Vault Search |      |      |      | ✓    | Single Sign-On (SSO) authentication for Enterprise Vault Search using Security Assertion Markup Language (SAML) 2.0 compliant Identity Providers (IdP). |
